PROFESSIONAL SUMMARY

I'm a final-year Interaction Design student at UPES, working across research, interaction, and visual design. What drew me to UX was a simple curiosity why do people do things the way they do? I enjoy noticing the small behaviours we often overlook and understanding what's really happening before jumping to a solution. That's how I like to design too - observe first, assume less.

EDUCATION

UPES

Bachelor's in Interaction Design

Dehradun, Uttarakhand

2023 – 2027

SKILLS

UX Research & Product Strategy: User Research, User Interviews, Surveys, Research Synthesis, Competitive Analysis, User Insights, Product Discovery, Information Architecture, Journey Mapping

Interaction & Product Design: Wireframing, User Flows, Interaction Design, Interaction Models, High-Fidelity Prototyping, End-to-End User Experience, Responsive Design, Accessibility Fundamentals

Visual Design & Delivery: Visual Design, Visual Language, Visual Hierarchy, Typography, Reusable Components, Design Specifications, Design Handoff

Design Tools: Figma, Adobe Photoshop, Adobe Illustrator, Adobe After Effects

AI Tools: ChatGPT, Gemini, Claude, Antigravity

PROFESSIONAL EXPERIENCE

Creative Intern: UI/UX & Visual Design

Xylity Technologies LLP

Jun 2025 – Aug 2025

Indore, M.P.

- Translated project requirements into user flows and wireframes, shaping the structure of an 8-screen mobile experience.
- Developed the experience from low-fidelity wireframes to high-fidelity UI, creating reusable components and collaborating with the developer through handoff to maintain design consistency.
- Extended my work into visual communication, translating stakeholder briefs into 6 client logos and 5+ promotional creatives.

PROJECTS

Gatha: Immersive XR Experience for Indian Art Forms | *UX Research, XR Design* Mar 2026

- Explored how people engage with and learn about Indian art through 10 user interviews, observational research, and visits to 5 museums.
- Synthesized research to uncover cultural-learning and engagement gaps, translating them into experience requirements for an immersive XR experience.
- Designed interactions across 5 Indian art forms, using spatial navigation, object manipulation, storytelling, multimodal feedback, and virtual art creation.

FridgeMate: Smart Fridge Inventory | *Product Design, UX Research*

Apr 2025

- Investigated everyday food-management behaviour through 6 user interviews and a 20-participant survey, uncovering gaps in inventory visibility and expiry awareness.
- Reframed the opportunity around maintaining awareness of stored food, rather than responding only when food is already forgotten or nearing spoilage.
- Translated the research into information architecture, core user flows, and a 5-screen experience for inventory and expiry management.
